

# Jira Board Test Cases

---

## TC-01: Verify that all 4 Kanban column headers exist on the board

**Severity:** NORMAL

**Description:** Ensure the board has 'BACKLOG', 'SELECTED FOR DEVELOPMENT', 'IN PROGRESS', and 'DONE' columns.

### Steps

1. Check if each column header text is visible on the board.

### Expected Result

All 4 column headers are present and visible.

## TC-02: Verify card counts match header counts in each column

**Severity:** CRITICAL

**Description:** Ensure that the number of cards matches the number shown in each column header.

### Steps

1. Go through each column and compare card count with the header value.

### Expected Result

Card count matches the number shown in the header for all columns.

## TC-03: Create a new Story ticket

**Severity:** CRITICAL

**Description:** Add a new Story issue with highest priority and assign it to Spiderman and Thor.

### Steps

1. Open the ticket creation modal.
2. Select issue type 'Story'.
3. Select priority 'Highest'.
4. Enter summary and description.
5. Assign the issue to Spiderman and Thor.
6. Submit and verify the card is created in the backlog.

### Expected Result

New card is added to the backlog with specified details.

## TC-04: Verify card detail panel visibility

**Severity:** NORMAL

**Description:** Click on a card and verify that the detail panel appears.

### Steps

1. Click on the card labeled 'Angular Spotify .
2. Ensure the detail panel appears.
3. Click the expand button and validate redirection URL ends with '2021'.

### Expected Result

Card detail panel is visible and navigation to detail page works correctly.

## TC-05: Move a card from Backlog to In Progress

**Severity:** CRITICAL

**Description:** Move a card and validate the update in the new column.

### Steps

1. Click a card in Backlog.
2. Change its status to 'In progress'.
3. Close the detail panel.
4. Ensure the card appears in 'In Progress' column.

### Expected Result

Card appears in the 'In Progress' column with the same title.

## TC-06: Search and validate card filter

**Severity:** NORMAL

**Description:** Ensure searching filters cards correctly.

### Steps

1. Enter the search keyword 'merry'.
2. Verify that matching cards are shown.
3. Ensure non-matching cards like 'STORY-2021' are hidden.

### Expected Result

'Merry Christmas' card is visible, others are filtered out.

### TC-07: Only My Issues filter

**Severity:** MINOR

**Description:** Validate that 'Only My Issues' reduces visible cards.

#### Steps

1. Count initial visible cards.
2. Click 'Only My Issues' filter.
3. Count visible cards again and compare.

#### Expected Result

Filtered count is less than initial count.

### TC-08: Ignore Resolved filter

**Severity:** MINOR

**Description:** Validate that DONE column becomes empty after filtering.

#### Steps

1. Click 'Ignore Resolved' filter button.
2. Ensure DONE column is empty.

#### Expected Result

'Done' column has 0 visible cards.

### TC-09: Hide sidebar functionality

**Severity:** NORMAL

**Description:** Validate that clicking toggle button collapses the sidebar.

#### Steps

1. Check sidebar width is 240px.
2. Click the collapse toggle.
3. Verify sidebar width is now 15px.

#### Expected Result

Sidebar is collapsed to width 15px.

## **TC-10: Change project name and category**

**Severity:** CRITICAL

**Description:** Validate that project settings allow changing the name and category.

### **Steps**

1. Go to Project Settings.
2. Change project name and select a new category.
3. Save changes and verify updated info on the board.

### **Expected Result**

Project name and category are updated correctly.
